

Technical drawing of a tapered bore (Kegelbohrung). The drawing shows a cross-section of a cylinder with a tapered internal bore. The outer diameter is labeled D and the inner diameter is labeled d . The length of the tapered section is labeled K and the width of the bore at the larger end is labeled B . The taper ratio is indicated as $\text{Kegel } 1:12$ and $\text{Taper } 1:12$. The drawing is labeled Kegelige Bohrung and Tapered bore .
