

Technical drawing of a double roller bearing assembly. The diagram shows two bearings mounted on a shaft, with a central dashed line indicating symmetry. Dimensions are labeled as follows:

- d_1 : Total width of the assembly.
- d : Distance between the inner rings of the two bearings.
- D_1 : Distance from the center of the shaft to the inner ring of one bearing.
- D : Total distance from the center of the shaft to the outer ring of one bearing.
- T : Total thickness of the bearing assembly.
