

Technical drawing of a double roller bearing assembly. The diagram shows two bearings mounted on a shaft, with a central dashed line indicating symmetry. Dimensions are labeled as follows:

- d_1 : Total width of the assembly.
- d : Distance between the centers of the two bearings.
- D_1 : Width of one bearing.
- D : Total width of the assembly (same as d_1).
- T : Thickness of the shaft.

With flat back faces
