

Technical drawing of a roller bearing. The main view on the left shows a side elevation with dimensions: B (width), D (outer diameter), and d (inner diameter). The bearing consists of two blue rings (rings) and two grey rollers (rollers). To the right, two cross-sections are shown: **ZZ** (Abgedeckt) and **2RS** (Abgedichtet). The **ZZ** cross-section shows the bearing with open ends, while the **2RS** cross-section shows the bearing with sealed ends.
