

A schematic diagram of a double-row ball bearing. The diagram shows a cross-section of the bearing with two rows of balls. The outer ring is shown in blue. The balls are shown in grey. The dimensions are labeled as follows: B is the width of the bearing, indicated by a horizontal double-headed arrow at the top. D is the outer diameter, indicated by a vertical double-headed arrow on the left. C is the distance between the two rows of balls, indicated by a vertical double-headed arrow on the right.
